PROMPT ENGINEERING LAB: (SOLO + PAIR)

Name: _____Sheharyar humayun_____

Partner: _____Muhammed Ali_____

Section: __NDD____

Date: November 10, 2026

AI tool used: ChatGPT

===== SECTION 1: SOLO =====

PART 1: SPOT THE PROBLEM

#	Main mistake	My better prompt
1	Too vague	My windows laptop is running slowly. Give me 5 troubleshooting steps to fix it.
2	Ignoring AI limitations	Explain which NHL teams are favorites to win next season's Stanley Cup and why.
3	Assuming the AI knows your context	My laptop application won't open. What information do you need to help me troubleshoot it?
4	Output format not specified	Give me a short shopping list of 5 healthy breakfast options.
5	Overloading with information	Plan a 7-day trip to Japan with a budget and packing list.

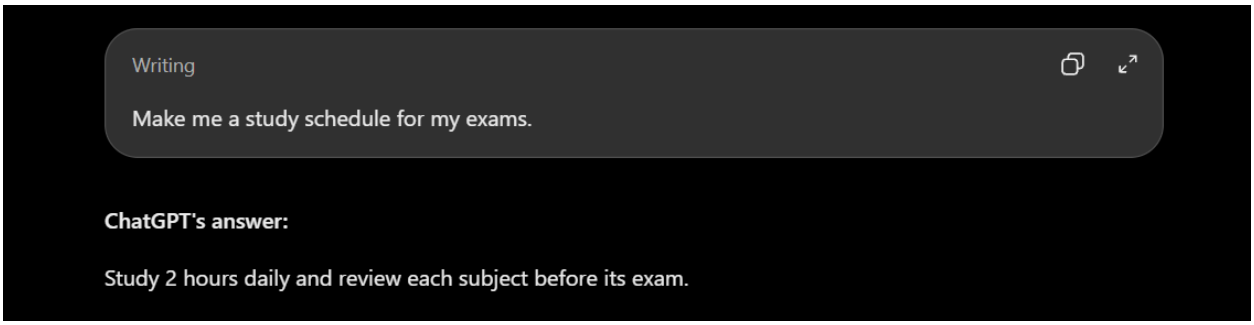

PART 2: PROMPT MAKEOVER

Scenario chosen: S5 – A study schedule for 3 midterms next week.

Version 1 prompt:

Make me a study schedule for my exams.

Screenshot: Version 1 answer (insert screenshot here).

Version 2 prompt (labelled):

[Context]: I am a college student with 3 midterm exams next week.

[Task]: Create a study schedule to help me prepare for all three exams.

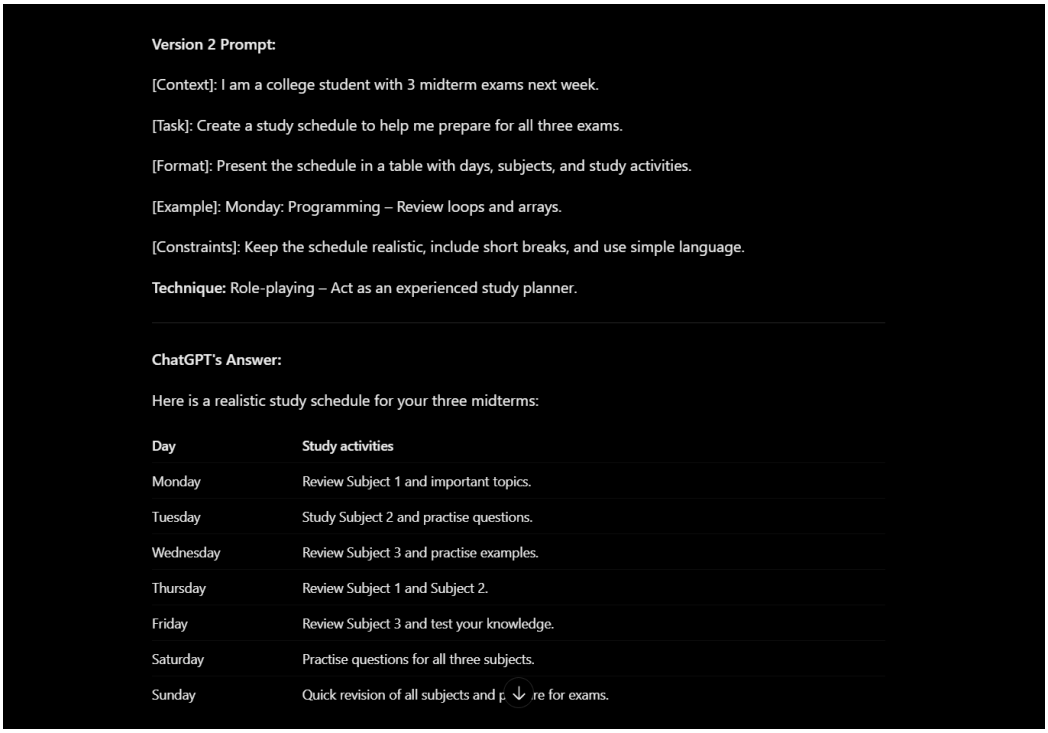

[Format]: Present the schedule in a table with days, subjects, and study activities.

[Example]: Monday: Programming – Review loops and arrays.

[Constraints]: Keep the schedule realistic, include short breaks, and use simple language.

Technique used: Role-playing – Asking the AI to act as an experienced study planner.

Screenshot: Version 2 answer (insert screenshot here).

Constraints: ✓
Technique: ✓
Suggestion from my partner:
Add the exact names of the three midterm subjects and the exam dates so the study schedule can be more specific and realistic.

PART 4: PROMPT CHAIN

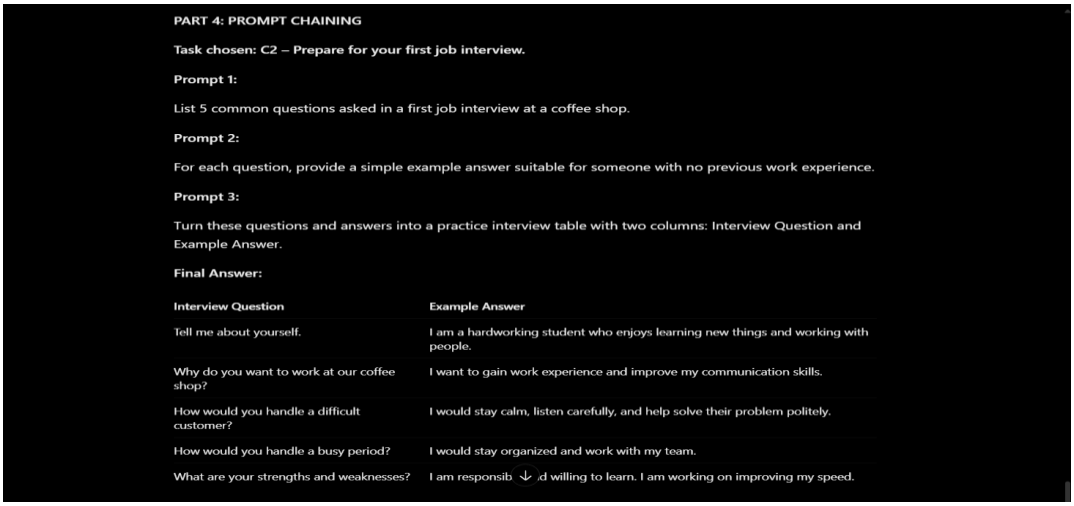

Task chosen: C2 – Prepare for your first job interview.

Prompt 1: List 5 common questions asked in a first job interview at a coffee shop.

Prompt 2: For each question, provide a simple example answer suitable for someone with no previous work experience.

Prompt 3: Turn these questions and answers into a practice interview table with two columns: Interview Question and Example Answer.

Screenshot of final answer: (insert screenshot here).

PART 4: PROMPT CHAINING

Task chosen: C2 – Prepare for your first job interview.

Prompt 1:

List 5 common questions asked in a first job interview at a coffee shop.

Prompt 2:

For each question, provide a simple example answer suitable for someone with no previous work experience.

Prompt 3:

Turn these questions and answers into a practice interview table with two columns: Interview Question and Example Answer.

Final Answer:

Interview Question	Example Answer
Tell me about yourself.	I am a hardworking student who enjoys learning new things and working with people.
Why do you want to work at our coffee shop?	I want to gain work experience and improve my communication skills.
How would you handle a difficult customer?	I would stay calm, listen carefully, and help solve their problem politely.
How would you handle a busy period?	I would stay organized and work with my team.
What are your strengths and weaknesses?	I am responsib ↓ d willing to learn. I am working on improving my speed.

PART 5: REFLECTION (MY OWN WORDS)

Q1: What did your partner's feedback teach you about your prompt?

Ans:1 My partner taught me that adding more details, such as subject names and exam dates, makes a prompt clearer and helps AI give more accurate answers.

Q2: Give one example of something you should not trust AI to answer correctly, and explain why.

Ans;2 I should not completely trust AI to predict future events because AI cannot know exactly what will happen.
